

## Litere volumetrice

Solutie pentru semnalistica de exterior si de interior a locatiilor (centre comerciale, sediu de firma, etc.), literele volumetrice realizate prin decupare computerizata, confera vizibilitate sporita si un stil de inalta clasa, prin efectul lor tridimensional.

De asemenea acest mod de "semnalizare" vine ca o solutie perfecta pentru cladirile aflate in zone protejate, fie monumente arhitecturale, fie cladiri cu arhitectura deosebita.

In functie de locul amplasarii si a efectului dorit, literele volumetrice se pot imparti dupa urmatoarele categorii:
